

COMPREHENSIVE Diploma of Cosmetic Gynecology (CDCG)

Description:

We are delighted to announce the release of the fourth edition of our comprehensive diploma in cosmetic gynecology (CDCG). Building upon previous experience and feedback from past trainees, we have enhanced our diploma to provide a more comprehensive, clinical, and practical learning experience.

This edition of our diploma includes 85 hours of online teaching and 40 hours of hands-on clinical and practical training, spanning over a period of 6 months. The online teaching will be interactive, directly connected to clinical practice, and will reflect the real-life scenarios encountered in this emerging sub-specialty. It will incorporate numerous case studies, pictures, and videos. The online curriculum will equip trainees with a solid evidence-based foundation of academic and practical knowledge, essential for their practice and ensuring the best outcomes and safety for their patients. This knowledge base will cover topics ranging from applied anatomy to managing complications from previous surgeries, including guidance on obtaining informed consent and setting up a clinic for office procedures.

The clinical and practical training will take place in Egypt and will involve working with real patients. Each trainee will have the opportunity to practice under the direct supervision of a professional trainer. The training will cover crucial skills such as taking a proper medical history, performing genital cosmetic examinations, assessing the dimensions of the vulva, preparing and administering nano fat and hyaluronic acid injections, utilizing energy-based devices, employing barbed threads, and mastering various surgical techniques (such as perineoplasty and vaginoplasty).

teaching and hands-on training will be conducted by a distinguished group of international professors and doctors from various countries, including Egypt, Jordan, Germany, UK, USA, Spain, and Mexico. This diverse group will consist of experts from different related specialties, such as gynecology, plastic surgery, dermatology, psychiatry, sexology, and nutrition. Throughout the teaching and training sessions, the trainers will consistently refer to the most up-to-date scientific evidence available.

COMPREHENSIVE Diploma of Cosmetic Gynecology (CDCG)

To support the teaching and learning process, continuous electronic communication will be facilitated between trainees, speakers, and trainers through platforms such as Facebook, WhatsApp, and a Learning Management System (LMS). This will enable ongoing learning through discussions, questions, and sharing of information.

Trainees will have access to a wealth of scientific learning materials, including books, articles, pictures, handouts, links, videos, and more.

Our diploma offers two unique advantages to trainees. Firstly, past trainees will have the opportunity to attend any session in future editions of our diploma for free, should they have missed certain presentations or wish to revisit specific topics. Secondly, after graduation, continuous technical support will be provided to trainees in their future practice. They will have the opportunity to consult with our professors and doctors, as well as receive any other necessary support.

Additionally, we provide two privileges to our graduates. Firstly, they will receive free registration for our next annual conference, and secondly, they will receive a free invitation to the annual alumni meetings.

Who can join?

- Gynecologists
- Plastic surgeons
- Dermatologists
- Fresh medical school graduates.

We offer two pathways: one for gynecologists and plastic surgeons, and another for dermatologists and fresh medical school graduates.
